An oak frame extension profile with a customer review

## BEAUTIFUL OAK FOR A BEAUTIFUL GARDEN

This year, we have built many pergolas, but the aesthetic of this design is simply fabulous!

Are you looking for the perfect place to entertain in your garden? If yes, then a custom-built pergola based on your own design and ideas from Premier Oak Buildings might be just what you need. Our workshop in Somerset can build any size, shape, or design that you desire. It's an excellent way to enhance your outdoor summer living experience.

*"Your dreams realised in oak"*

# Oak Frame Garage

## FROM IDEA TO DESIGN, PLAN AND BUILD – COMPLETE PACKAGE

Our customer had been searching for a purpose-built garage that could accommodate his cars. He approached us with his requirements, and we collaborated on a design that incorporated his ideas and needs. We discussed the choice of cladding material to achieve the desired finish, and the roofing materials were selected to complement the oak frame. The final outcome is an elegant garage that looks stunning. Here is what Brett had to say:

*"The Premier Oak Buildings team are professional, highly skilled and reliable. They were able to quickly understand my needs, produced drawings and a proposal, along with estimated build times and costs in record time. Once engaged communication was excellent, they were happy to explain the process and options, as well as incorporating custom requirements and specialist on site needs during construction."*

We have the ability to construct garages of any size or design, including corner or L-shaped plans. We can also provide additional space for storage or utility use by adding extra doorways if required. Our design process is flexible and can accommodate any space constraints. To talk through your plans for that perfect garage just give us a call.

## A REVIEW FROM ONE OF OUR CUSTOMERS

---

"A beautifully designed oak-framed extension that enhances your living space with both extra room and style."

*"Working with Premier Oak has honestly been a pleasure. They are not only a lovely group of people, they are also undoubtedly exceptional at what they do. Our building offered plenty of challenges which they rose to without complaint or fuss. I have been impressed on every level and wouldn't hesitate to recommend them or use them again" - Victoria*

We assisted Victoria in achieving her goal of adding an oak-framed extension to her beautiful property. First, we collaborated with Victoria and her architect to create a design that matched her desired aesthetic. Once the design was finalized, we created the necessary drawings, built the frame in our workshop, and then installed it on-site. The builder was then able to complete the roof and other works. The extension has undeniably added to the home's beauty and created the extra space and wow factor that Victoria was hoping for.
